Public Comments on Proposed LGA Amendments

The Navajo Nation Division of Community Development and the agency Local Governance Support Centers are encouraging the participation of chapter members, staff and officials for the public hearings on the proposed amendments to the Local Governance Act, also known as Title 26 of the Navajo Nation Code.

The purpose of these hearings are to share the proposed changes to the legislation with regard to protecting chapter assets and dealing with theft, fraud and financial mismanagement. These amendments are the first of its kind since the legislation was enacted in April 1998.

The significant changes to the legislation include certification and acknowledgment of enhanced chapter authorities, duties and responsibilities, certified chapter duties and responsibilities, and chapter government requirements. The public comment period will allow community members to voice their thoughts and opinions on the proposed legislative changes before it is brought before the Resources and Development Committee of the 22nd Navajo Nation Council.

The proposed LGA amendments are available on the Division of Community Development website at: www.nndcd.org. For more information, call 928-871-6442 or email rtsosie@nndcd.org.

We look forward to your participation at your local agency. Join us for free lunch!
